

## Phase 1

Phase 1 implements basic functionality for p2p linked articles but does not include any smart contract functionality. This will allow for testing and short-term usage of the protocol, but no permanent channels. Status: In Progress

## Phase 2

Ethereum smart contracts and integration. Status: Not Started

## Phase 3

Possible features are article table of contents, mobile client, one-user multi-device support, embedded payment functionality, improved editor, etc.
